

Cap 9

Box model

you

The lounge guys have supplied a lot of new text describing the lounge and what it offers.

They've included a set of elixir specials for the week.

And they even let visitors sample some of the music that is played in the lounge each week, a common request of customers.

Finally, they've got some legalese in the footer of the page with a copyright.

Head First Lounge

 There's a new graphic for the header of the page.

Welcome to the Head First Lounge

The Head First Lounge is, no doubt, the biggest crowd-pleaser in Webville. Stop in to sample the eclectic offerings of elixirs, teas, and coffees, or stay a bit longer and enjoy the multicultural culinary menu that combines a harmony of taste, texture, and color with the best in fresh and healthy ingredients.

During your stay at the lounge, you'll enjoy a smooth mixture of ambient and exotic sounds, filling the lounge and adding an extra dimension to your dining experience. The dance surrounds you with the relaxing sentiments of nights from one past. And, don't forget, the lounge offers free wireless access to the Internet, so bring your laptop.

Our guarantee at the lounge, we're committed to providing you, our guest, with an exceptional experience every time you visit. Whether you're just stepping by to check in on email over an elixir, or are here for an out-of-the-ordinary dinner, you'll find our knowledgeable service staff pay attention to every detail. If you're not fully satisfied, have a Blueberry Blue Elixir on us.

But that's not all; at night, join us in the backroom as our resident DJ spins a choice selection of trance and drum&bas beats across our spacious 600-themed dance floor. Or just hang out in one of our comfy white vinyl booths at the dance bar. You can have your elixirs delivered from the main lounge right to the dance floor. If you've had enough of the heat, just head back to the lounge area to relax. And, no matter where you find yourself in the lounge, you'll always be connected with our wireless Internet access.

Now that you've experienced the lounge [in-situ](#), isn't it time to check us out [for-real](#)? We're located right in the heart of Webville, and we've created some [detailed directions](#) to get you here in record time. No reservations necessary; come and join us anytime.

Weekly Elixir Specials

Lemon Brew

The ultimate healthy drink, this elixir combines herbal botanicals, minerals, and vitamins with a twist of lemon into a smooth citrus wonder that will keep your immune system going all day and all night.

Chai Chiller

Not your traditional chai, this elixir mixes real chai spices and adds an extra chocolate kick for a caffeinated taste sensation on ice.

Black Brain Brew

Want to boost your memory? Try our Black Brain Brew elixir, made with black codon grass and just a touch of espresso. Your brain will thank you for the boost.

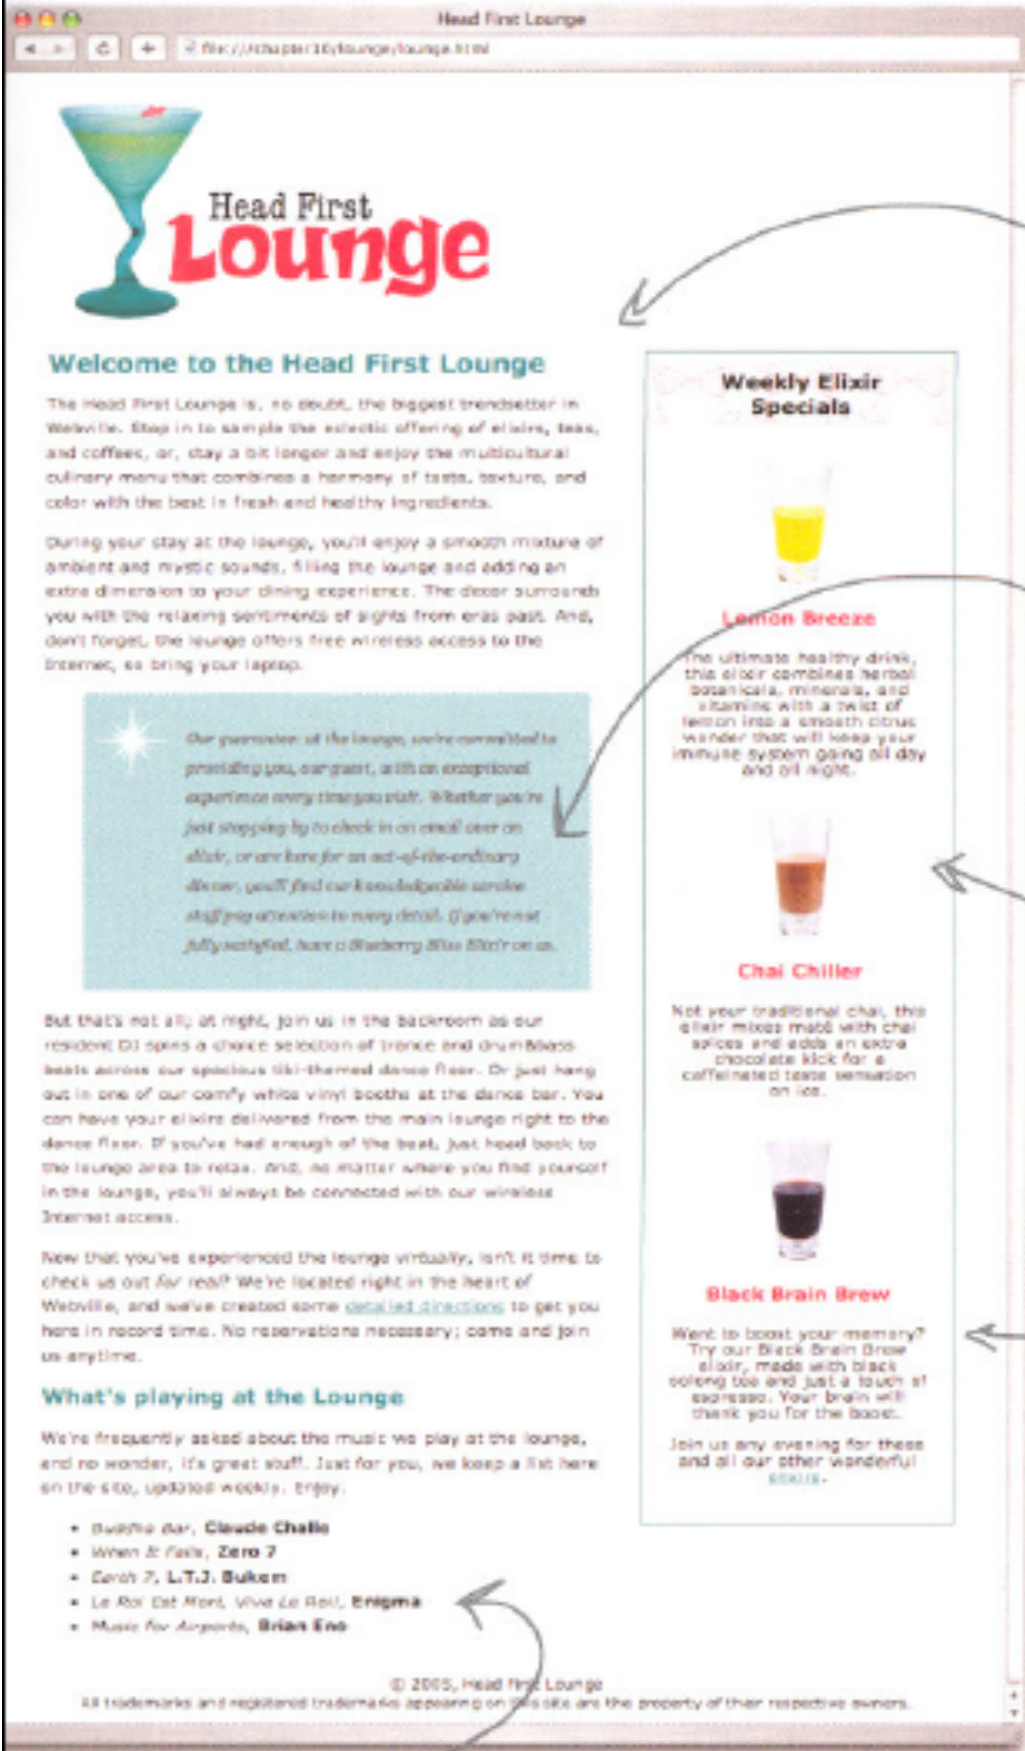

Join us any evening for these and all our other wonderful [elixirs](#).

What's playing at the Lounge

We're frequently asked about the music we play at the lounge, and no wonder. It's great stuff. Just for you, we keep a list here on the site, updated weekly. Enjoy.

- Bobble Be, Claude Chalk
- When It Falls, Zoro 7
- Earth 7, L.T.J. Bekem
- Le Roi Et Moi, Vire Le Roi, Engima
- Music for Alpers, Brian Eno

Welcome to the Head First Lounge

The Head First Lounge is, no doubt, the biggest trendsetter in Webville. Step in to sample the eclectic offering of elixirs, teas, and coffees, or, stay a bit longer and enjoy the multicultural culinary menu that combines a harmony of taste, texture, and color with the best in fresh and healthy ingredients.

During your stay at the lounge, you'll enjoy a smooth mixture of ambient and mystic sounds, filling the lounge and adding an extra dimension to your dining experience. The decor surrounds you with the relaxing sentiments of sights from eras past. And, don't forget, the lounge offers free wireless access to the Internet, so bring your laptop.

Our guarantee at the lounge, we're committed to providing you, our guest, with an exceptional experience every time you visit. Whether you're just stopping by to check in on email over an elixir, or are here for an out-of-the-ordinary drink, you'll find our knowledgeable service staff paying attention to every detail. If you're not fully satisfied, here's a Raspberry Bliss Elixir on us.

But that's not all; at night, join us in the backroom as our resident DJ spins a choice selection of tracks and drum & bass beats across our spacious 181-themed dance floor. Or just hang out in one of our comfy white vinyl booths at the dance bar. You can have your elixirs delivered from the main lounge right to the dance floor. If you've had enough of the beat, just head back to the lounge area to relax. And, no matter where you find yourself in the lounge, you'll always be connected with our wireless Internet access.

Now that you've experienced the lounge virtually, isn't it time to check us out for real? We're located right in the heart of Webville, and we've created some [detailed directions](#) to get you here in record time. No reservations necessary; come and join us anytime.

What's playing at the Lounge

We're frequently asked about the music we play at the lounge, and no wonder, it's great stuff. Just for you, we keep a list here on the site, updated weekly. Enjoy.

- Duetto Bar, **Claude Challe**
- When It Falls, **Zero 7**
- Carols 7, **L.T.J. Bukem**
- Le Roi Est Mort, Vive Le Roi!, **Enigma**
- Music For Airports, **Brian Eno**

We've got headings that match the site's color theme, an aquamarine. The fonts are also a very readable sans-serif.

This paragraph has been highly stylized, which helps set it off from the text and gives the page an attractive look. It also looks like the font is a serif font, which is different from the main text.

The elixirs have been dramatically restyled into an appetizing display of drinks.

The elixirs have also been moved over to the side. How did that happen?

The music CDs and artists are styled now too.

And the footer is centered and displayed in a very small font.

Starting with a few simple upgrades

Now you're all ready to start styling the lounge. Let's add a few rules to your CSS just to get some basics out of the way—like the font family, size, and some color—that will immediately improve the lounge (and give you a good review from the last chapter). So, open your “lounge.css” file and add the following rules.

```
body {  
    font-size: small;  
    font-family: Verdana, Helvetica, Arial, sans-serif;  
}
```

Here's the default font size for the page.

```
h1, h2 {  
    color: #007e7e;  
}
```

We're going to go with a sans-serif font family for the lounge. We've picked a few font alternatives, and ended the declaration with the generic sans-serif font.

```
h1 {  
    font-size: 150%;  
}
```

We're going to set the color of the <h1> and <h2> elements to an aquamarine to match the glass in the logo.

```
h2 {  
    font-size: 130%;  
}
```

Now let's get some reasonable heading sizes for <h1> and <h2>. Since we're setting two different sizes for these, we need separate rules and can't add them to the combined rule for <h1> and <h2>.

Esercizio

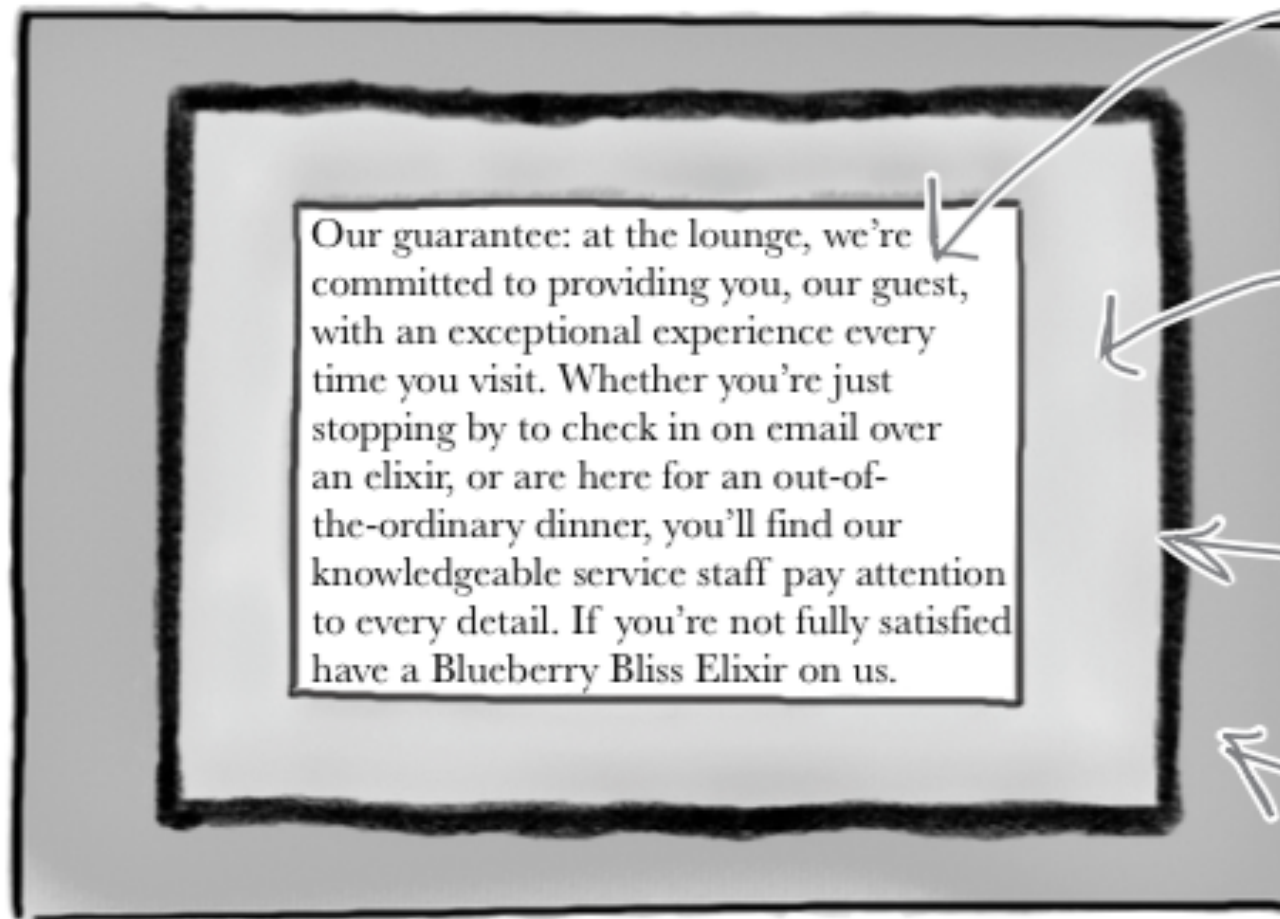

Try a few different values for line-height, like 200%, .5em, and 20px to see the effect. Which looks the best? The worst? Which is most readable? When you're done, make sure you change the line-height back to 1.6em.

Box Model

From the perspective of CSS, every element is a box.

Every box is made up of a content area along with optional padding, border, and margins.

The content area holds the content (text or an image, for instance).

The content area is surrounded by optional transparent padding.

An optional border can be placed around the padding.

And finally, an optional transparent margin surrounds everything.

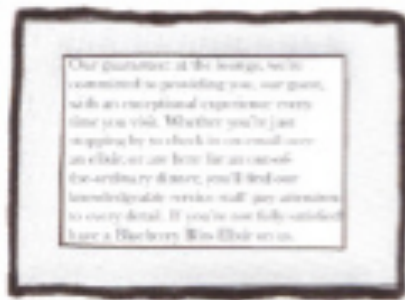

All elements are treated as boxes: paragraphs, headings, block quotes, lists, list items, and so on. Even inline elements like `` and links are treated by CSS as boxes.

What you can do to boxes

Boxes

You can style a box to have padding, a border, and a margin.

Or, just padding and a border.

Or just a border.

Or a margin with no border and no padding.

Borders

You can have solid borders, thick or thin.

Or no border at all.

Or choose from eight different styles of borders, like dashed.

Or even color your borders.

Padding

With CSS you can control padding on any side of the content area. Here we've got a lot of left and right padding.

And here a lot of top and bottom padding.

And here the content is offset to the bottom right with padding on the top and left.

Margins

You have the same level of control over the margins. Here there's a lot of top and bottom margin.

And here's a lot of left and right margin.

And like padding, you can specify all sides independently to create margins like this.

Content Area

You can even control width and height in a variety of ways. Here, the content area has been made wide.

And here the content area is tall but thin.

The paragraph has a blue background.

And the text looks serif, not sans-serif, and it's italic.

There's even a graphic in the paragraph.

Notice the paragraph looks indented a bit.

There's a stylish, ragged looking border.

The text is offset from the border.

Our guarantee: at the lounge, we're committed to providing you, our guest, with an exceptional experience every time you visit. Whether you're just stopping by to check in on email over an elixir, or are here for an out-of-the-ordinary dinner, you'll find our knowledgeable service staff pay attention to every detail. If you're not fully satisfied, have a Blueberry Bliss Elixir on us.

Weekly Elixir Specials

Lemon Breeze

The ultimate healthy drink, this elixir combines herbal botanicals, minerals, and vitamins with a twist of lemon into a smooth citrus wonder that will keep your immune system going all day and all night.

Chai Chiller

Not your traditional chai, this elixir mixes masala with chai spices and adds an extra chocolate kick for a caffeinated taste sensation on ice.

Black Brain Brew

Want to boost your memory? Try our Black Brain Brew elixir, made with black colong tea and just a touch of espresso. Your brain will thank you for the boost.

Join us any evening for these and all our other wonderful elixirs.

But that's not all; at night, join us in the backroom as our resident DJ spins a choice selection of trance and drum&bass beats across our spacious DJ-themed dance floor. Or just hang out in one of our comfy white vinyl booths at the dance bar. You can have your elixirs delivered from the main lounge right to the dance floor. If you've had enough of the beat, just head back to the lounge area to relax. And, no matter where you find yourself in the lounge, you'll always be connected with our wireless Internet access.

Now that you've experienced the lounge virtually, isn't it time to check us out for real? We're located right in the heart of Webville, and we've created some [detailed directions](#) to get you here in record time. No reservations necessary; come and join us anytime.

What's playing at the Lounge

We're frequently asked about the music we play at the lounge, and no wonder, it's great stuff. Just for you, we keep a list here on the site, updated weekly. Enjoy.

- **Bubble Bar, Claude Challe**
- **When It Falls, Zero 7**
- **Earth 2, L.T.J. Bukem**
- **Le Roi Est Mort, Vive Le Roi!, Enigma**
- **Music for Airports, Brian Eno**

Sharpen your pencil

See if you can identify the padding, border, and margins of this paragraph. Mark all the padding and margins (left, right, top, and bottom):

don't forget, the lounge offers free wireless access to the Internet, so bring your laptop.

Our guarantee: at the lounge, we're committed to providing you, our guest, with an exceptional experience every time you visit. Whether you're just stopping by to check in on email over an elixir, or are here for an out-of-the-ordinary dinner, you'll find our knowledgeable service staff pay attention to every detail. If you're not fully satisfied, have a Blueberry Bliss Elixir on us.

But that's not all; at night, join us in the backroom as our resident DJ spins a choice selection of trance and drum&bass beats across our spacious tiki-themed dance floor. Or just hang

Creating the guarantee style

- 1 Open your "lounge.html" file and locate the paragraph that starts "Our guarantee". Add a class called "guarantee" to the element like this:

 Add the class attribute along with a value of "guarantee". Remember, a class will allow you to style this paragraph independently of the other paragraphs.

```
<p class="guarantee">
```

```
Our guarantee: at the lounge, we're committed to providing you, our guest, with an exceptional experience every time you visit. Whether you're just stopping by to check in on email over an elixir, or are here for an out-of-the-ordinary dinner, you'll find our knowledgeable service staff pay attention to every detail. If you're not fully satisfied have a Blueberry Bliss Elixir on us.
```

```
</p>
```

esercizio lounge

- 2 Save your "lounge.html" file and open the "lounge.css" file. You're going to add a border and background color to the guarantee paragraph. Add the following CSS to the bottom of your style sheet and then save.

```
.guarantee {  
  border-color:    black;  
  border-width:   1px;  
  border-style:   solid;  
  background-color: #a7cece;  
}
```

The first three properties add a border to any element that is in the guarantee class. So far that's just this paragraph.

We're making the color of the border black...

... and one pixel thick...

... and solid.

We're also giving the element a background color, which will help you see the difference between padding and margins, and make the guarantee look good.

A test drive of the paragraph border

Reload the page in your browser and you'll now see the guarantee paragraph with an aquamarine background and a thin black border around it. Let's examine this a little more closely...

It doesn't look like the paragraph has any padding around the content - there is no space between the text and the border.

the lounge and adding an extra dimension to your dining experience. The decor surrounds you with the relaxing sentiments of sights from eras past. And, don't forget, the lounge offers free wireless access to the Internet, so bring your laptop.

Our guarantee: at the lounge, we're committed to providing you, our guest, with an exceptional experience every time you visit. Whether you're just stopping by to check in on email over an elixir, or are here for an out-of-the-ordinary dinner, you'll find our knowledgeable service staff pay attention to every detail. If you're not fully satisfied, have a Blueberry Bliss Elixir on us.

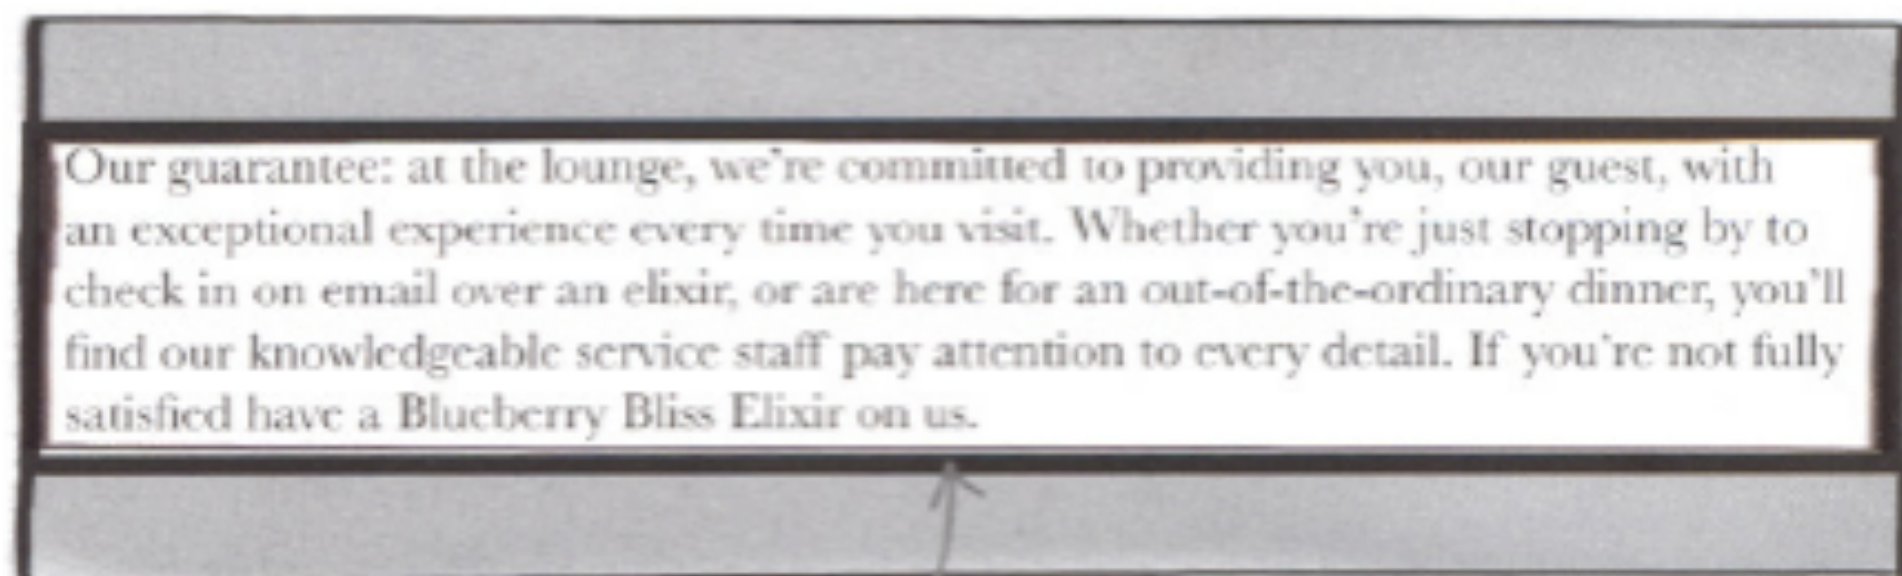

But that's not all; at night, join us in the backroom as our resident DJ spins a choice selection of trance and drum&bass beats across our spacious tiki-themed dance floor. Or just hang out in one of our comfy white vinyl booths at the dance bar. You can have your elixirs delivered from the main

But there does seem to be a margin on the top and bottom of the paragraph element.

There isn't a noticeable margin between the left and right edges of the paragraph and the browser window edges.

Here's what the paragraph would look like if we drew it as a box model diagram:

We've got a top and bottom margin.

But the left and right margins are very small.

And we have a border, but it's right up against the content, which means the padding is set very small, or there's no padding at all.

Padding, border, margin for the guarantee

We definitely need some padding all around the content.

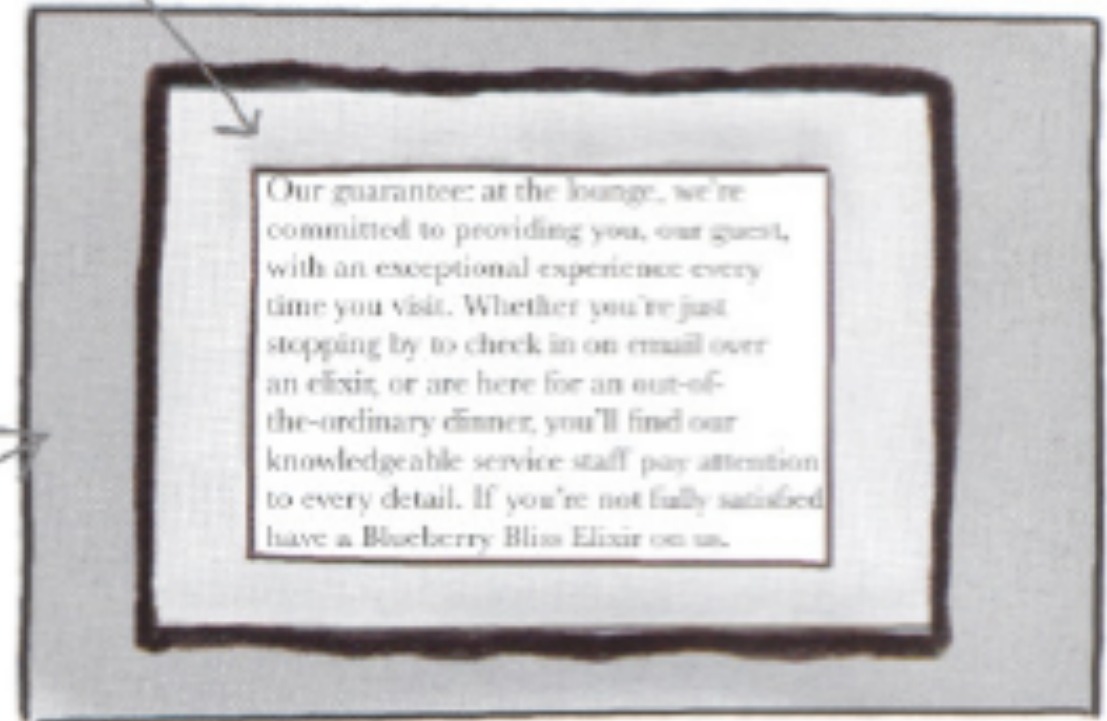

don't forget, the lounge offers free wireless access to the Internet, so bring your laptop.

Our guarantee: at the lounge, we're committed to providing you, our guest, with an exceptional experience every time you visit. Whether you're just stopping by to check in on email over an elixir, or are here for an out-of-the-ordinary dinner, you'll find our knowledgeable service staff pay attention to every detail. If you're not fully satisfied, have a Blueberry Bliss Elixir on us.

But that's not all; at night, join us in the backroom as our resident DJ spins a choice selection of trance and drum&bass beats across our spacious tiki-themed dance floor. Or just hang

We're also going to need a slightly different border. This border looks ragged, not like a solid line.

And we want some more margin space around the paragraph.

Adding some padding

```
.guarantee {  
    border-color:    black;  
    border-width:   1px;  
    border-style:   solid;  
    background-color: #a7cece;  
    padding:        25px;  
}
```

We're adding 25 pixels of padding to all sides of the content (top, right, bottom, and left).

A test drive with some padding

When you reload the page in your browser, you'll notice the text in the guarantee paragraph has a little more breathing room on the sides now. There's some space between the text and the border, and it's much easier to read.

Now you can see 25 pixels of space between the edge of the text content and the border.

Notice that the background color is under both the content and the padding. But it doesn't extend into the margin.

the relaxing sentiments of sights from eras past. And, don't forget, the lounge offers free wireless access to the Internet, so bring your laptop.

Our guarantee: at the lounge, we're committed to providing you, our guest, with an exceptional experience every time you visit. Whether you're just stopping by to check in on email over an elixir, or are here for an out-of-the-ordinary dinner, you'll find our knowledgeable service staff pay attention to every detail. If you're not fully satisfied, have a Blueberry Bliss Elixir on us.

But that's not all; at night, join us in the backroom as our resident DJ spins a choice selection of trance and drum&bass beats across our spacious tiki-themed dance floor. Or just hang out in one of

Adding some margin

```
.guarantee {  
    border-color:    black;  
    border-width:   1px;  
    border-style:   solid;  
    background-color: #a7cece;  
    padding:       25px;  
    margin:        30px;  
}
```

We're adding 30 pixels of margin to all sides of the content (top, right, bottom, and left).

A test drive with the margin

When you reload the lounge page, you'll see the paragraph is really beginning to stand out on the page. With the margins in place, the paragraph looks inset from the rest of the text, and that, combined with the background color, makes it look more like a "call out" than an ordinary paragraph. As you can see, with only a few lines of CSS, you're doing some powerful things.

Now we have 30 pixels of margin on all sides.

the relaxing sentiments of sights from eras past. And, don't forget, the lounge offers free wireless access to the Internet, so bring your laptop.

Our guarantee: at the lounge, we're committed to providing you, our guest, with an exceptional experience every time you visit. Whether you're just stopping by to check in on email over an elixir, or are here for an out-of-the-ordinary dinner, you'll find our knowledgeable service staff pay attention to every detail. If you're not fully satisfied, have a Blueberry Bliss Elixir on us.

But that's not all; at night, join us in the backroom as our resident DJ spins a choice selection of trance and drum&bass beats across our spacious tiki-themed dance floor. Or just hang out in one of

Exercise

If you look at the guarantee paragraph as it's supposed to look in its final form, it has an italic, serif font, a line height greater than the rest of the page, and (if you're looking really close) gray text. Write the CSS below to set the line height to 1.9em, the font style to italic, the color to #444444, and the font family to Georgia, "Times New Roman", Times, serif. Check your CSS with the answers in the back of the chapter, then type it in and test.

Adding a background image

```
.guarantee {  
  line-height: 1.9em;  
  font-style: italic;  
  font-family: Georgia, "Times New Roman", Times, serif;  
  color: #444444;  
  border-color: black;  
  border-width: 1px;  
  border-style: solid;  
  background-color: #a7cece;  
  padding: 25px;  
  margin: 30px;  
  background-image: url(images/background.gif);  
}
```

Here are the properties you added
in the exercise on the previous page.

Add this to your CSS, save, and reload your page.

Wait a sec, it seems like we have two ways to put images on a page. Is background-image a replacement for the `` element?

No, the **background-image** property has a very specific purpose, which is to set the background image of an element. It isn't for placing images in a page – for that you definitely want to use the `` element.

Think about it this way: a background image is pure presentation, and the only reason you would use a **background-image** is to improve the attractiveness of your element. An `` element, on the other hand, is used to include an image that has a more substantial role in the page, like a photo or a logo.

Now, we could have just placed the image inside the paragraph, and we could probably get the same look and feel, but the guarantee star is pure decoration – it has no real meaning on the page and it's only meant to make the element look better. So, **background-image** makes more sense.

Test driving the background image

Here's the guarantee star image in the background. Notice that it sits on top of the background color, and because it has a transparent background, it lets the color show through.

Also notice that background images, like the background color, only show under the content area and padding, and not outside the border in the margin.

CSS Up Close

The **`background-image`** property places an image in the background of an element. Two other properties also affect the background image: **`background-position`** and **`background-repeat`**.

```
background-image: url(images/background.gif);
```

The `background-image` property is set to a URL, which can be a relative path or a full blown URL (`http://...`).

Notice that no quotes are required around the URL.

Fixing the background image

```
.guarantee {  
  line-height:      1.9em;  
  font-style:       italic;  
  font-family:      Georgia, "Times New Roman", Times, serif;  
  color:            #444444;  
  border-color:     black;  
  border-width:     1px;  
  border-style:     solid;  
  background-color: #a7cece;  
  padding:          25px;  
  margin:           30px;  
  background-image: url(images/background.gif);  
  background-repeat: no-repeat;  
  background-position: top left;  
}
```

← You've got two new properties to add.

We want the background image to not repeat

And we want it in the top left corner.

Fixing the background image

The background-position property sets the position of the image and can be specified in pixels, or as a percentage, or by using keywords like top, left, right, bottom, and center.

```
background-position: top left;
```

Places the image in the top, left of the element.

There are many different ways to position things in CSS and we'll be talking more about that in two chapters.

By default, a background image is "tiled", or repeated over and over to fill the background space. The background-repeat property controls how this tiling behaves.

```
background-repeat: repeat;
```

Sets the image to repeat both horizontally and vertically. This is the default behavior.

Here are the other background-repeat values you can use.

`no-repeat` ← Display the image once, don't repeat the image at all.

`repeat-x` ← Repeat the image only horizontally.

`repeat-y` ← Repeat the image only vertically.

`inherit` ← Just do whatever the parent element does.

Another test drive of the background image

Here we go again. This time, it looks like we're much closer to what we want. But, since this is a background image, the text can sit on top of it. How do we fix this? That's exactly what padding is for! Padding allows you to add visual space around the content area. Let's increase the padding on the left and see if we can nail this down once and for all.

This is much better. Now the image isn't repeated.

But we'd really like for the text not to run over the top of the image.

How do you adding padding only on the left?

```
.guarantee {  
  line-height: 1.9em;  
  font-style: italic;  
  font-family: Georgia, "Times New Roman", Times, serif;  
  color: #444444;  
  border-color: black;  
  border-width: 1px;  
  border-style: solid;  
  background-color: #a7cece;  
  padding: 25px;  
  padding-left: 80px;  
  margin: 30px;  
  background-image: url(images/background.gif);  
  background-repeat: no-repeat;  
  background-position: top left;  
}
```

We're using the padding-left property to increase the padding on the left.

Notice that we first set the padding on all sides to 25 pixels, and then we specify a property for the left side.

Order matters here - if you switch the order, then you'll set the padding for the left side first, and then the general padding property will set all sides back to 25 pixels, including the left side!

How do you increase the margin just on the right?

You do this just like you did with the padding: add another property, `margin-right`, to increase the right margin.

See the pattern? There's a property to control all sides together, and properties for each side if you want to set them individually.

```
.guarantee {  
    line-height:      1.9em;  
    font-style:       italic;  
    font-family:      Georgia, "Times New Roman", Times, serif;  
    color:            #444444;  
    border-color:     black;  
    border-width:     1px;  
    border-style:     solid;  
    background-color: #a7cece;  
    padding:         25px;  
    padding-left:    80px;  
    margin:          30px;  
    margin-right:    250px;  
    background-image: url(images/background.gif);  
    background-repeat: no-repeat;  
    background-position: top left;  
}
```

Remember we're already setting the margins to be 30 pixels.

And now we're going to override that setting for the right side, and set it to 250 pixels.

Add the new `margin-right` property and reload. Now the paragraph should have 250 pixels of margin on the right side.

Border Style

The border-style property controls the visual style of the border. There are eight border styles available, from a solid line to dotted lines to ridges and grooves.

```
border-style: groove;
```

To specify a border style just use the border-style property and a value of one of the available styles.

The solid style is just what it sounds like, a solid border.

Go with **solid**, the original.

The dotted style looks like a series of dots.

Once you go **dotted** you'll never go back.

The double style uses two lines.

Go with **double**, I'm twice the fun.

And the dashed style is just a set of dashes round the border.

Ignore dotted, use **dashed**.

A groove style looks like a groove in the page (difficult to see in a book).

I'm the border that's got the **groove**.

The inset style looks like an inset that sinks into the page.

I'm the only "in" style: **inset**.

The outset style looks like an outset that rises from the page.

Go with me, I've been better since the **outset**.

The ridge style looks like a raised ridge on the page.

I'm more fun; I've got **ridges**.

Border Width

The border-width property controls the width of the border. You can use keywords or pixels to specify the width.

```
border-width: thin;
```

```
border-width: 5px;
```

You can specify widths using the keywords thin, medium, or thick, or by the number of pixels.

	thin		1px
	medium		2px
	thick		3px
	thin		4px
	medium		5px
	thick		6px

Border Color

The `border-color` property sets the color of the border. This works just like setting font colors; you can use color names, rgb values, or hex codes to specify color.

```
border-color: red;
```

```
border-color: rgb(100%, 0%, 0%);
```

```
border-color: #ff0000;
```

Use `border-color` to specify the color of a border. You can use any of the common ways to specify color.

Specifying Border Sides

```
border-top-color  
border-top-style  
border-top-width
```

```
border-right-color  
border-right-style  
border-right-width
```

```
border-bottom-color  
border-bottom-style  
border-bottom-width
```

```
border-left-color  
border-left-style  
border-left-width
```

Just like margins and padding you can specify border style, width, or color on any side (top, right, bottom, or left):

```
border-top-color: black;  
border-top-style: dashed;  
border-top-width: thick;
```

↑
These properties are for the top border only. You can specify each side of the border independently.

Border Corners

You can create rounded corners on all four corners, or just one corner, or any combination.

You can specify all four corners with one number.

`border-radius: 15px;`

`border-top-left-radius: 3em;`
`border-top-right-radius: 3em;`
`border-bottom-right-radius: 3em;`
`border-bottom-left-radius: 3em;`

Or you can specify each corner separately. Notice that you can use px or em to specify the radius size.

If you use em, the measurement of the border radius is relative to the font size of the element, just like when you use em for font-size.

`border-top-left-radius: 15px;`
`border-top-right-radius: 0px;`
`border-bottom-right-radius: 0px;`
`border-bottom-left-radius: 15px;`

You can get all kinds of interesting shapes using border-radius.

Write your CSS here

30px

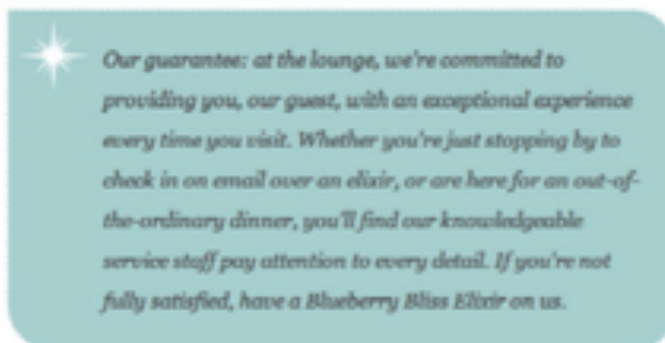

```
border-top-left-radius: 30px;  
border-top-right-radius: 0px;  
border-bottom-right-radius: 0px;  
border-bottom-left-radius: 30px;
```

40px

```
border-top-left-radius: 40px;  
border-top-right-radius: 40px;  
border-bottom-right-radius: 40px;  
border-bottom-left-radius: 40px;
```

40px

```
border-top-left-radius: 0px;  
border-top-right-radius: 40px;  
border-bottom-right-radius: 40px;  
border-bottom-left-radius: 40px;
```

2em

```
border-top-left-radius: 0em;  
border-top-right-radius: 2em;  
border-bottom-right-radius: 0em;  
border-bottom-left-radius: 2em;
```

How to use id in CSS

```
p.specials {  
  color: red;  
}
```

This selects only paragraphs that are in the specials class.

```
.specials {  
  color: red;  
}
```

This selects all elements in the specials class.

```
#footer {  
  color: red;  
}
```

This selects any element that has the id "footer".

```
p#footer {  
  color: red;  
}
```

This selects a <p> element if it has the id "footer".

Using an id in the lounge

```
<p id="guarantee">
```

```
