Using Google Charts

<https://developers.google.com/chart>

How Much Pizza I Ate Last Night

we want to represent this data

type: string label: Topping	type: number label: Slices
Mushrooms	3
Onions	1
Olives	1
Zucchini	1
Pepperoni	2

Step 1

create a container div inside an html page

```
<!--Div that will hold the pie chart-->  
<div id="chart_div"></div>
```

Step 2

create a .js file with the following content

```
// Load the Visualization API and the piechart package.  
google.load('visualization', '1.0', {'packages':['corechart']});  
  
// Set a callback to run when the Google Visualization API is loaded.  
google.setOnLoadCallback(drawChart);
```

we're going to define this function!

other packages

- annotationchart
- bar
- calendar
- gauge
- geochart
- line
- map
- orgchart
- sankey
- table
- timeline
- treemap
- wordtree

Step 3

create the **drawChart()** function

```
// Callback that creates and populates a data table,  
// instantiates the pie chart, passes in the data and  
// draws it.  
function drawChart() {  
  
    chart.draw(data, options);  
  
}
```

Step 4

define the data

```
// Callback that creates and populates a data table,  
// instantiates the pie chart, passes in the data and  
// draws it.  
function drawChart() {  
  
    // Create the data table.  
    var data = new google.visualization.DataTable();  
    data.addColumn('string', 'Topping');  
    data.addColumn('number', 'Slices');  
    data.addRows([  
        ['Mushrooms', 3],  
        ['Onions', 1],  
        ['Olives', 1],  
        ['Zucchini', 1],  
        ['Pepperoni', 2]  
    ]);  
}
```

my data

...set the options

```
// Set chart options
var options = {
  'title': 'How Much Pizza I Ate Last Night',
  'width': 400,
  'height': 300
};
```

...continue

```
// Instantiate and draw our chart, passing in some options.  
var chart = new google.visualization.PieChart(  
    document.getElementById('chart_div')  
);  
  
chart.draw(data, options);  
}  
|
```

this will draw a pie chart

end of the **drawChart()** function

```
// Load the Visualization API and the piechart package.  
google.load('visualization', '1.0', {'packages':['corechart']});  
  
// Set a callback to run when the Google Visualization API is loaded.  
google.setOnLoadCallback(drawChart);  
  
// Callback that creates and populates a data table,  
// instantiates the pie chart, passes in the data and  
// draws it.  
function drawChart() {  
  
    // Create the data table.  
    var data = new google.visualization.DataTable();  
    data.addColumn('string', 'Topping');  
    data.addColumn('number', 'Slices');  
    data.addRows([  
        ['Mushrooms', 3],  
        ['Onions', 1],  
        ['Olives', 1],  
        ['Zucchini', 1],  
        ['Pepperoni', 2]  
    ]);  
  
    // Set chart options  
    var options = {  
        'title': 'How Much Pizza I Ate Last Night',  
        'width': 400,  
        'height': 300,  
    };  
  
    // Instantiate and draw our chart, passing in some options.  
    var chart = new google.visualization.PieChart(  
        document.getElementById('chart_div')  
    );  
  
    chart.draw(data, options);  
}
```

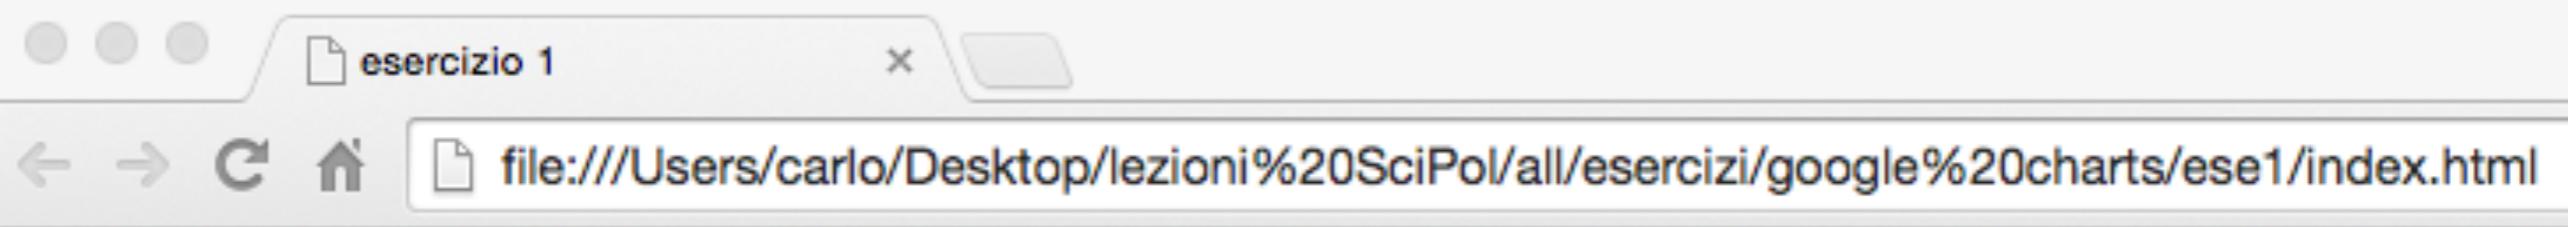

complete code

Step 5

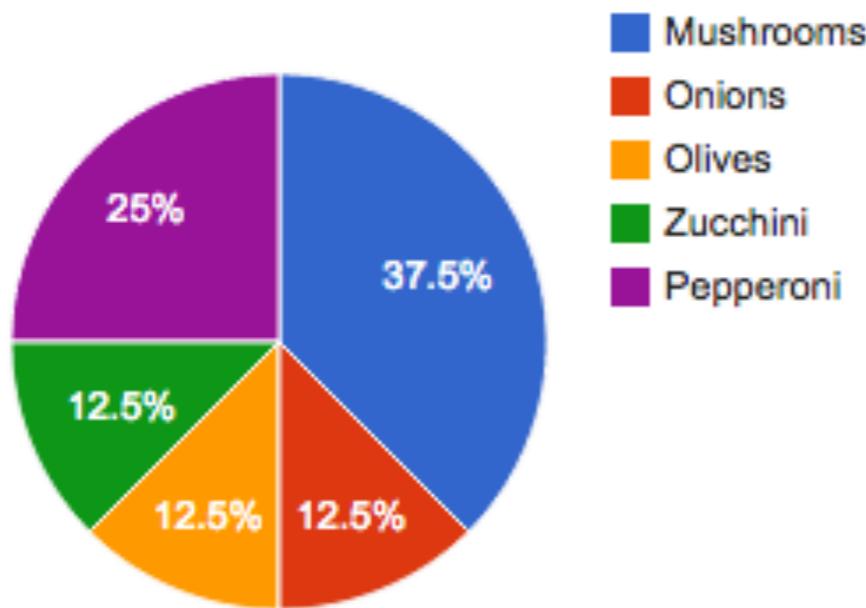

import google's api and our script inside the html

```
<script src="https://www.google.com/jsapi"></script>
<script src="js/script.js"></script>
```

result 1

How Much Pizza I Ate Last Night

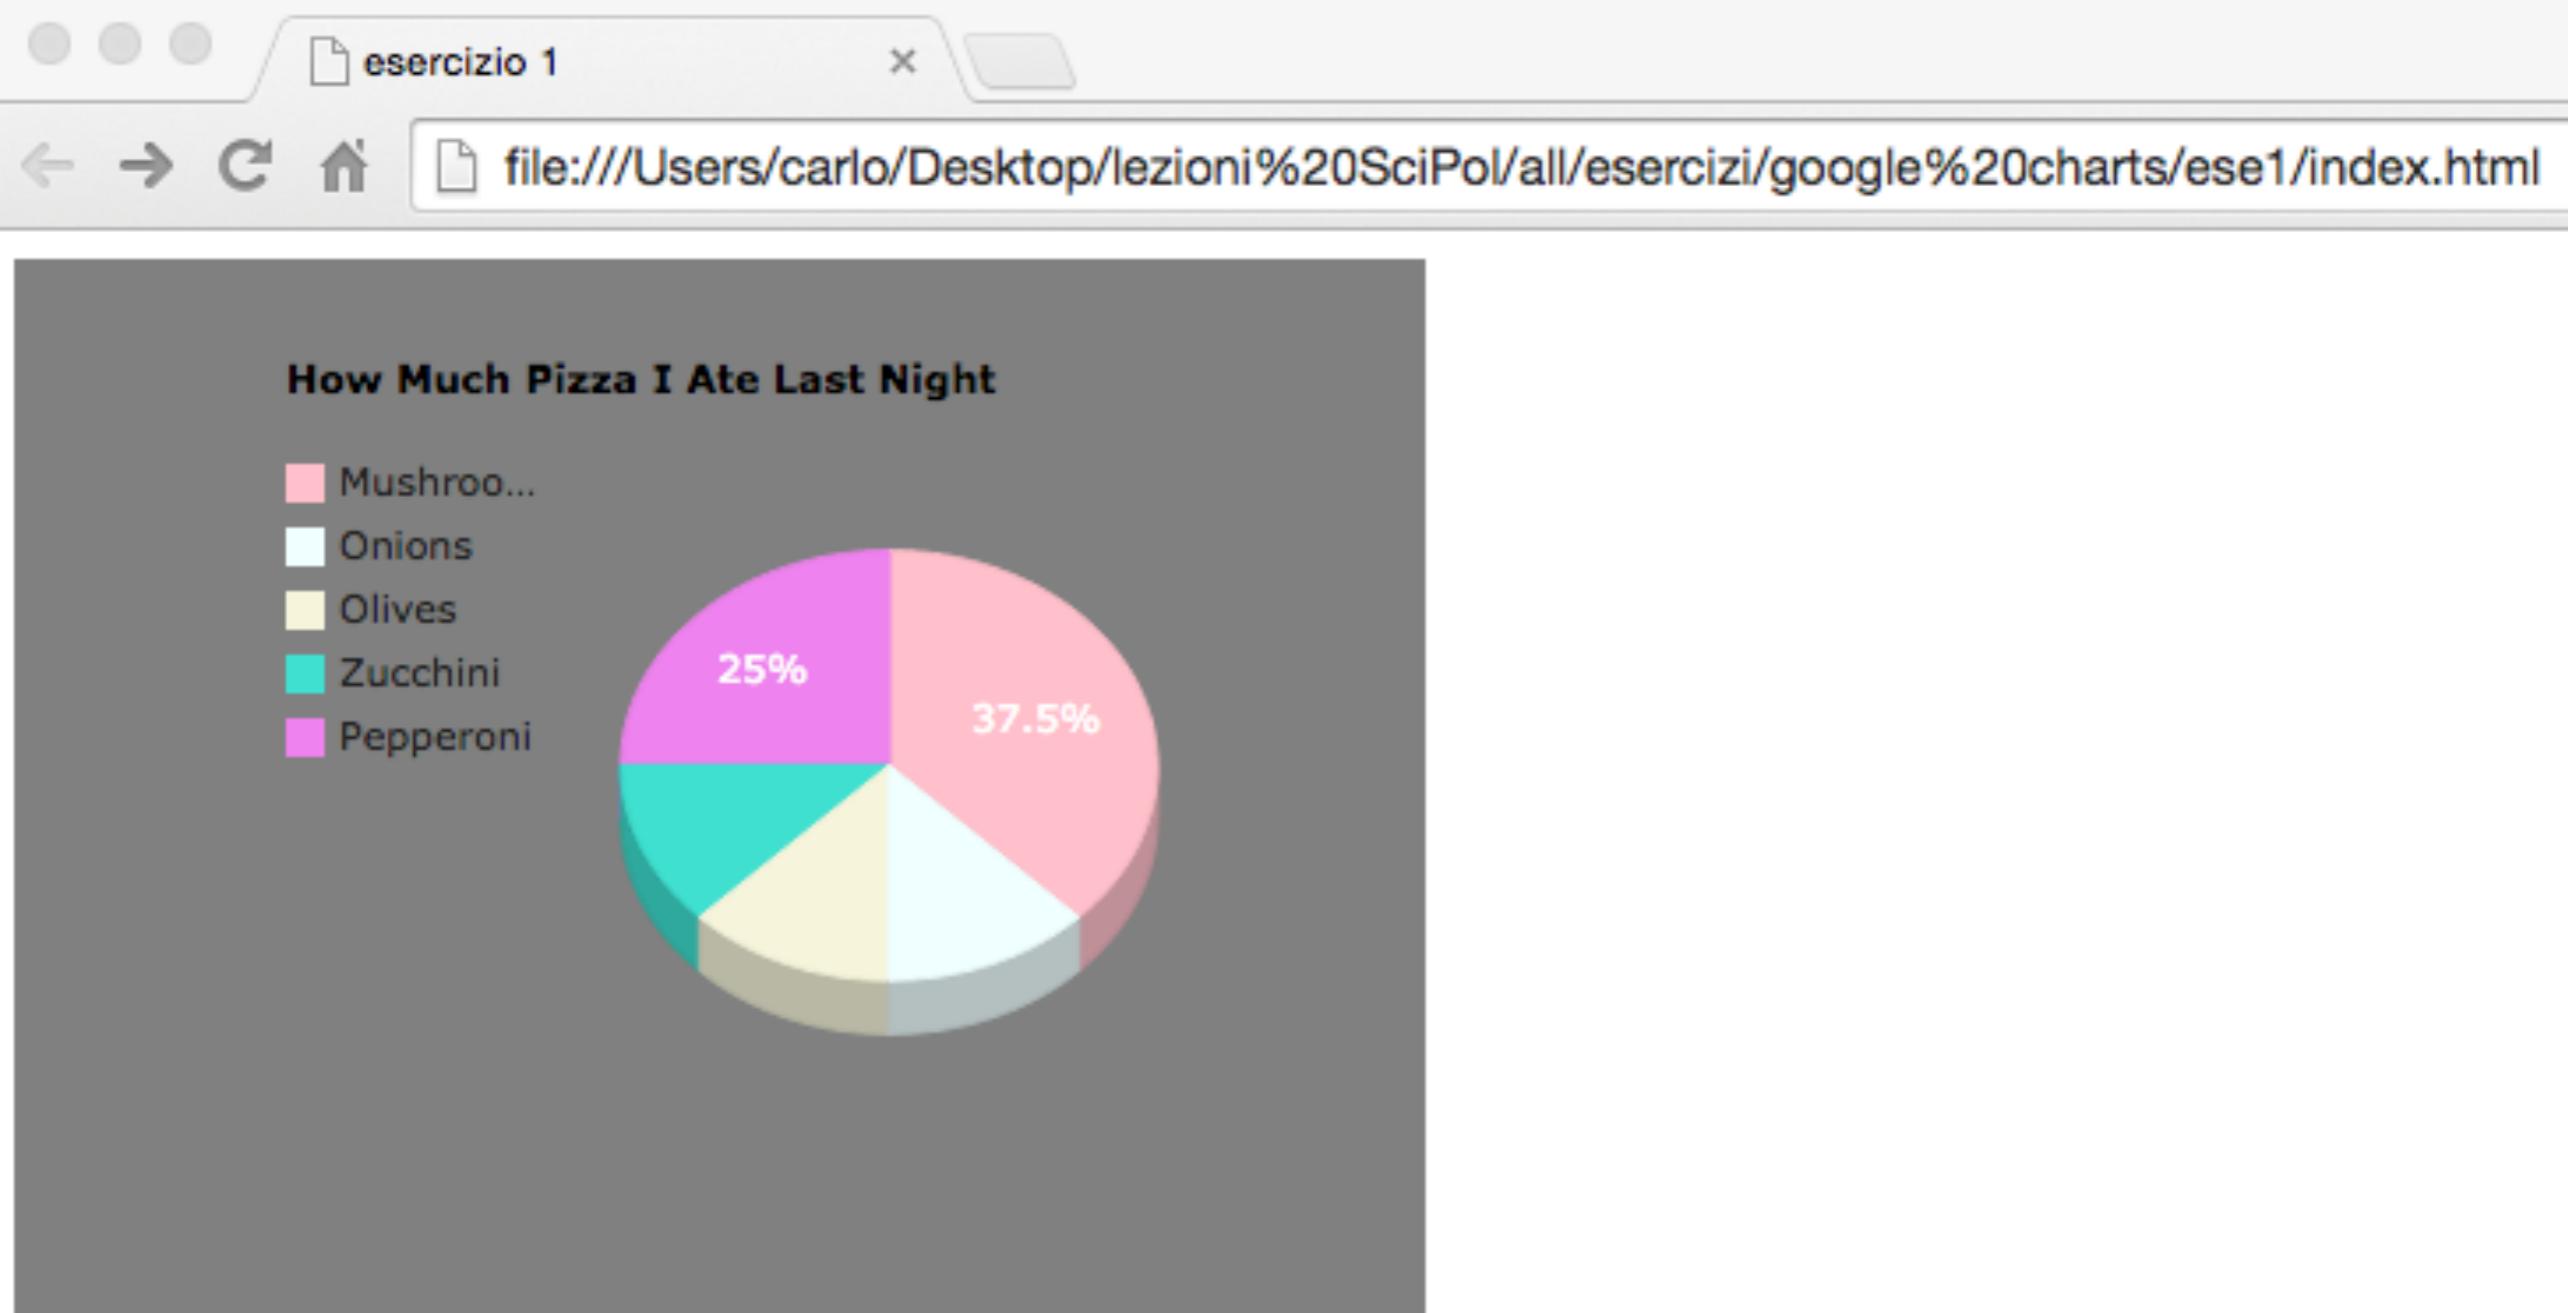

Customizing the Chart

```
// Set chart options
var options = {
  'title': 'How Much Pizza I Ate Last Night',
  'width': 400,
  'height': 300,
  'backgroundColor': 'grey',
  'colors': ['pink', 'azure', 'beige', 'turquoise', 'violet'],
  'fontName': 'Verdana',
  'is3D': true,
  'legend': 'left'
};
```

https://developers.google.com/chart/interactive/docs/gallery/piechart#Configuration_Options

result 2

How about a bar chart?

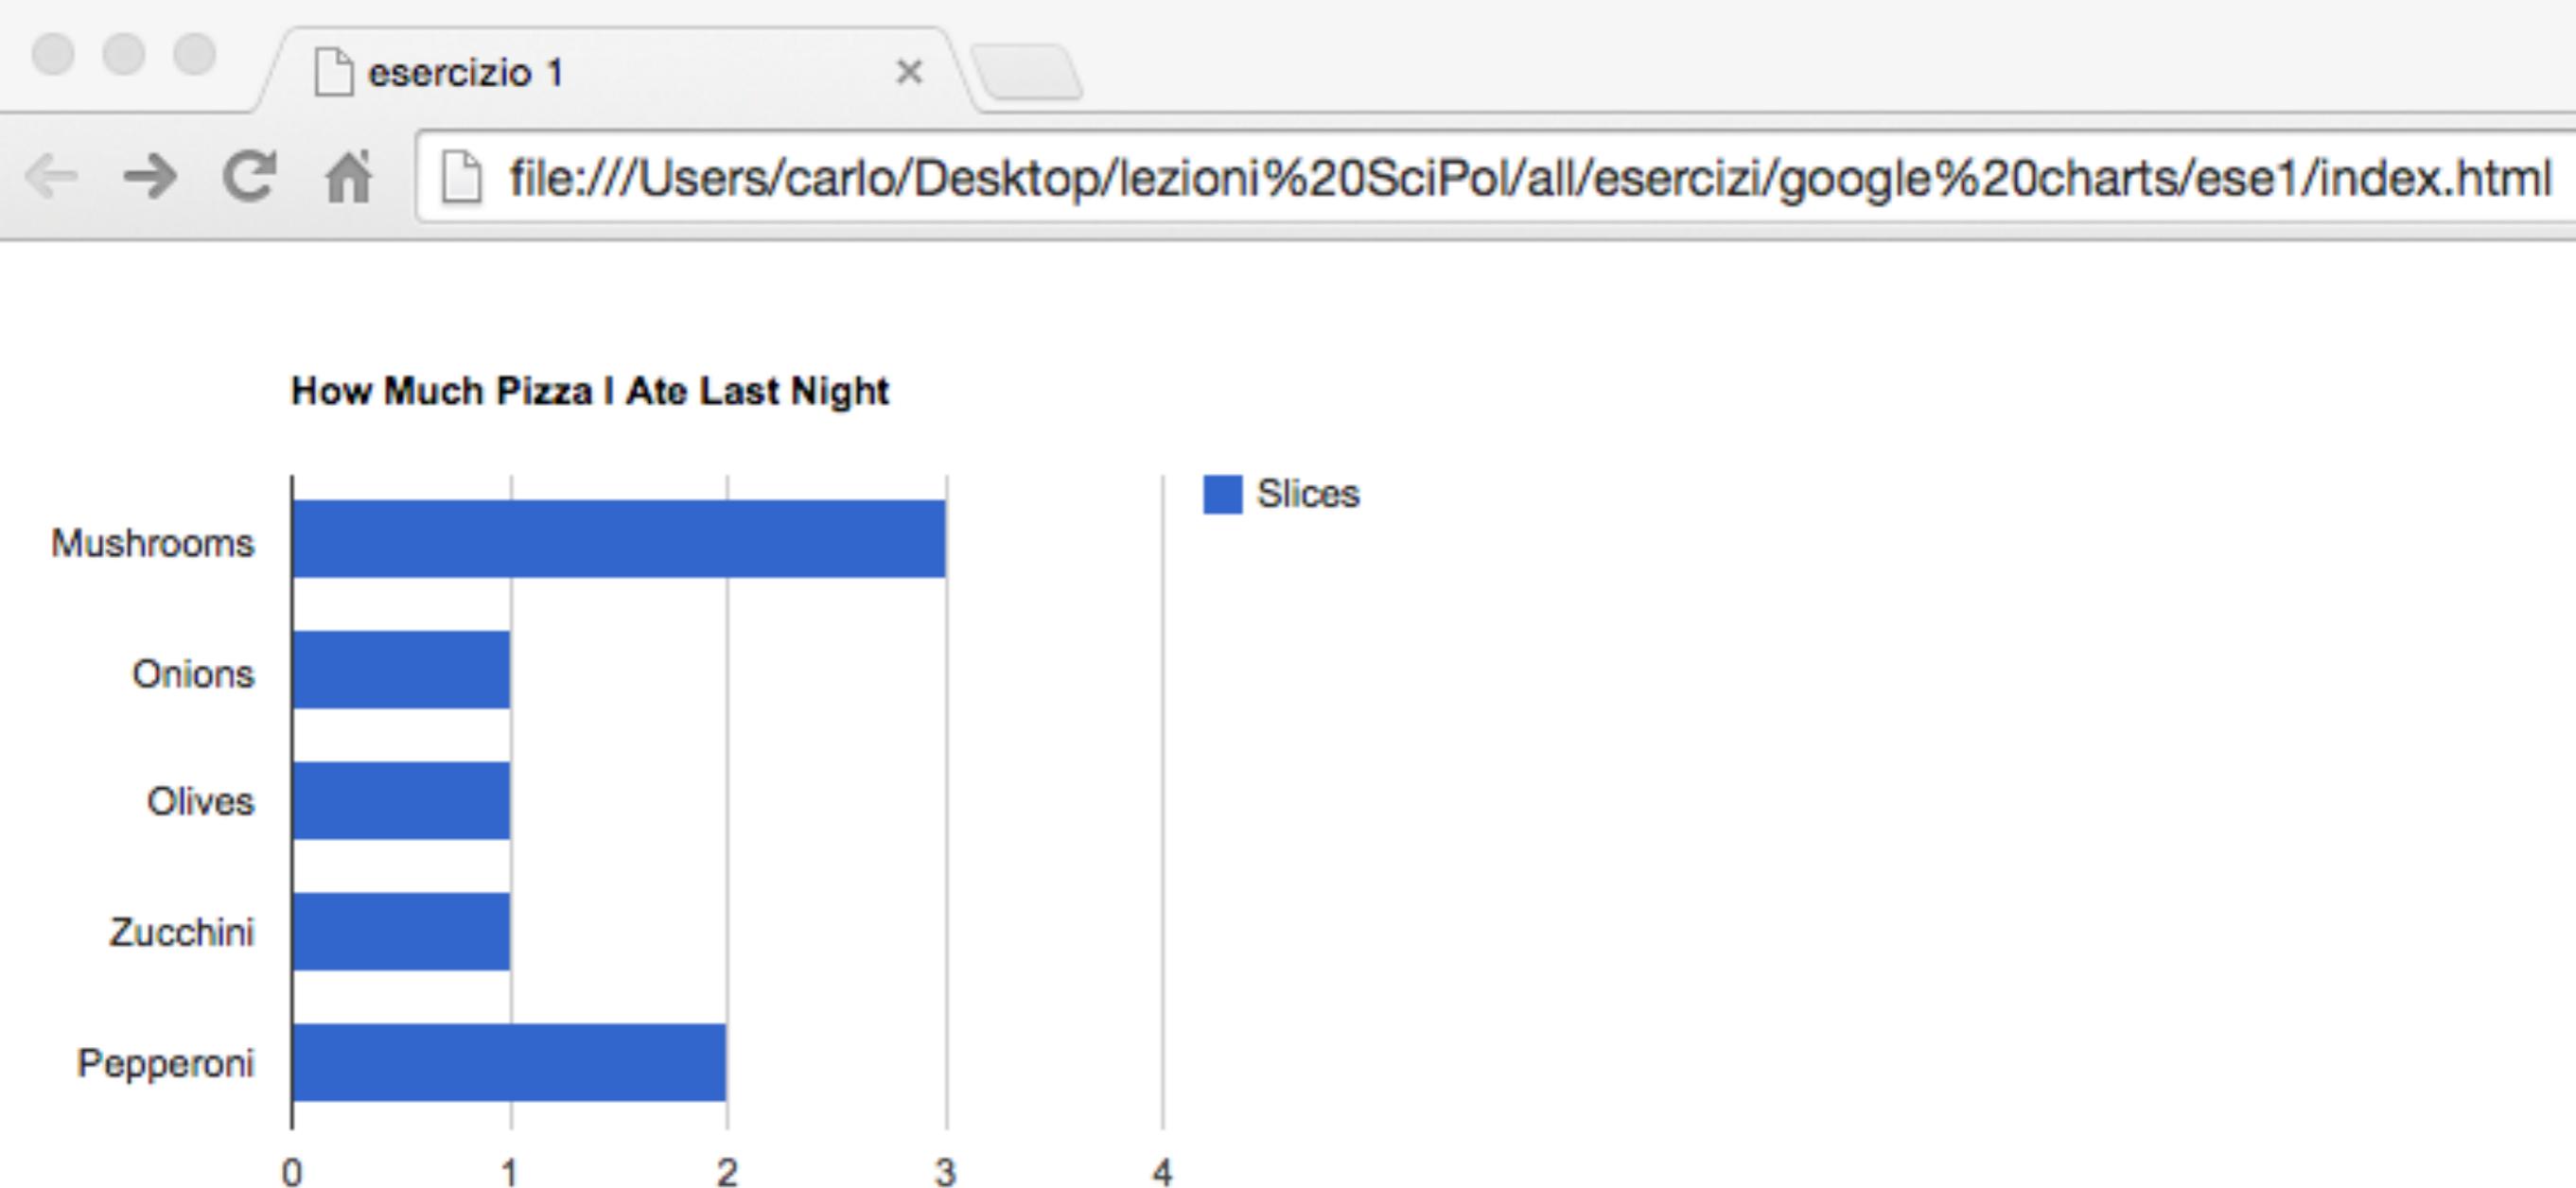

just replace **PieChart**

```
var chart = new google.visualization.PieChart(
```

with **BarChart**

```
var chart = new google.visualization.BarChart(
```

result 3

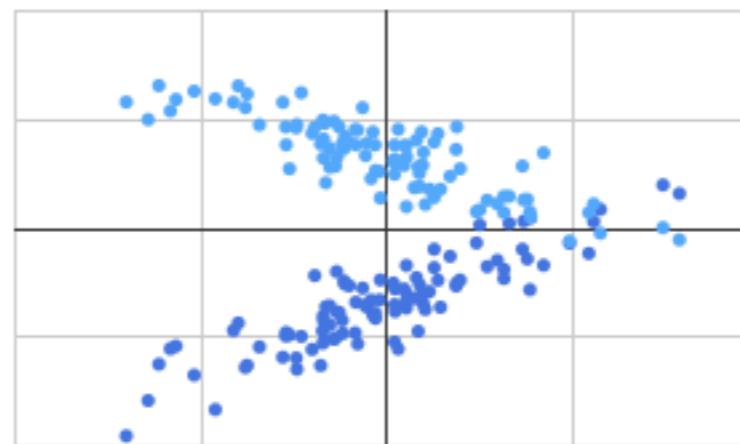

more charts on
<https://developers.google.com/chart/interactive/docs/gallery>

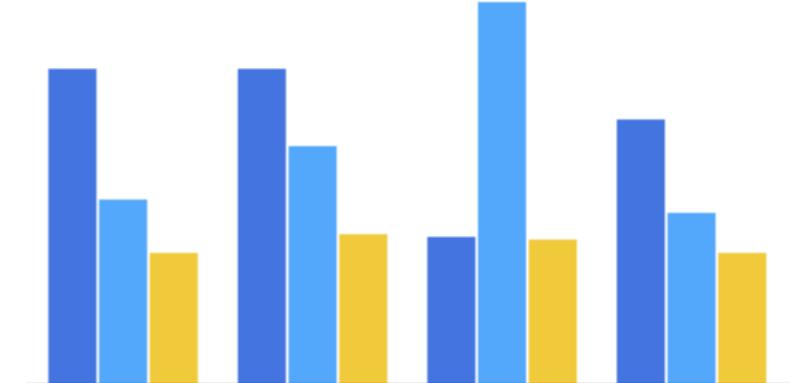

Geo Chart

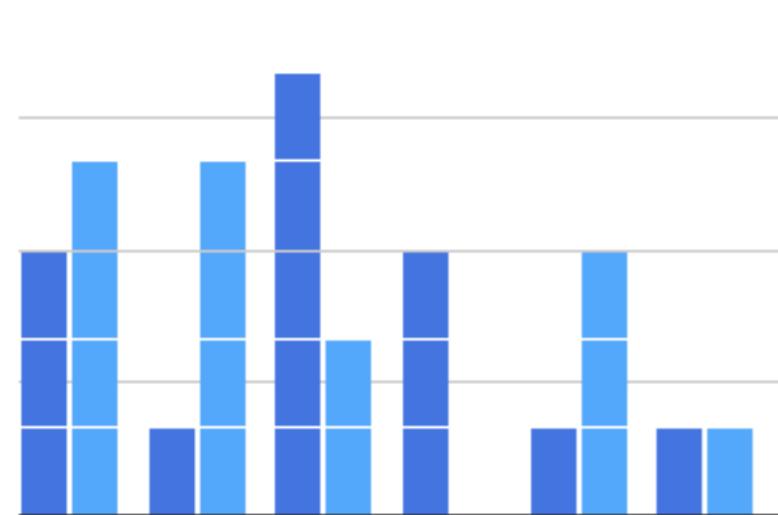

Scatter Chart

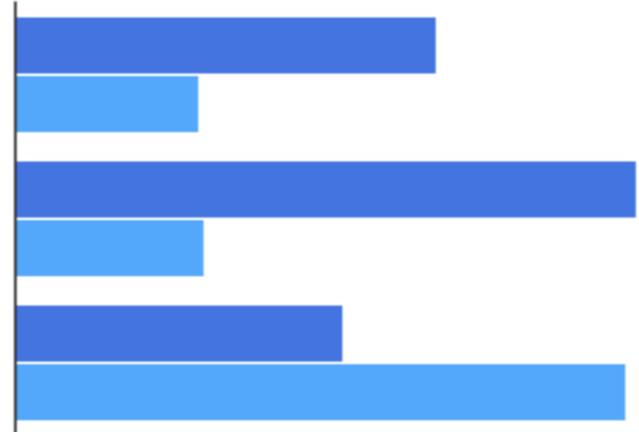

Column Chart

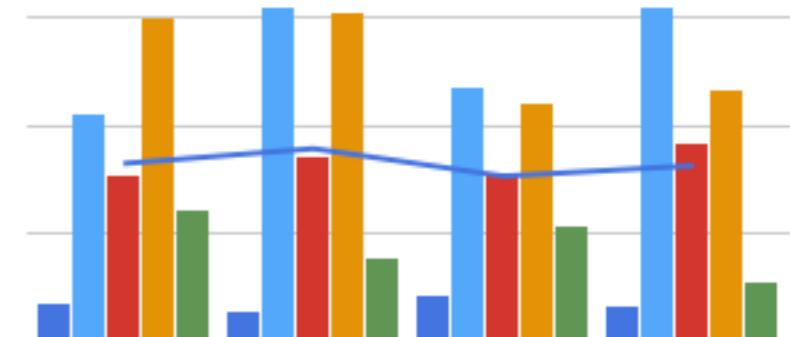

Histogram

Bar Chart

Combo Chart

Both pie and bar charts are included in the **corechart** package

```
// Load the Visualization API and the piechart package.  
google.load('visualization', '1.0', {'packages':['corechart']});
```

However, if you want a [treemap](#) or [geo chart](#) on your page, you must additionally load the '[treemap](#)' or '[geomap](#)' packages.
